Project Title: Breast Cancer Biomarkers Based on Fine Needle Aspirates

Principle Investigator: Michael H. Torosian, M.D.

Institution: Fox Chase Cancer Center

Performance Period: 1 May 1999 - 30 April 2000

Breast cancer is the most common cancer and a leading cause of cancer deaths in women in the United States. The purpose of this project is to identify one or more biomarkers which can be used to identify women at highest risk of developing breast cancer before cancer develops. Prior to undergoing breast surgery, women at increased and normal risk of developing breast cancer will undergo fine needle aspiration (FNA) for determining a series of cytologic, cell cycle and molecular biologic markers of clinical significance for cancer development.

The specific aims of this study are to:

1. Compare the findings of biomarkers in FNA specimens in women at increased versus normal risk of breast cancer.
2. To determine if FNA specimens are adequate to perform biomarker assays and if this technique could be used in the general outpatient setting.
3. To determine if biomarker levels between high risk and control patients are concordant or discordant and if one or more of the specific biomarkers can distinguish high-risk from control patients. Specifically, the biomarkers will include cellular morphology (cytology), cell cycle analysis (DNA index, cell cycle parameters and proliferation index) and molecular biologic markers (epidermal growth factor receptor overexpression, p53 and RAS hotspot mutations and hypermethylation of specific gene products including p16, GSTP 1 and E-cadherin) of clinical significance for the development of cancer.

At Fox Chase Cancer Center, a combined research team of clinicians and researchers are able to perform these analyses. Samples will be collected on patients who consent to the study and who are undergoing elective breast surgery. Our goal is to study approximately 200 patients over a 3 year period with this technique.

This is an import research project with tremendous clinical implications. All of the biomarkers chosen for testing and analysis have known importance for the development of cancer. Our goal is to identify one or more of these biomarkers which will provide important information regarding breast cancer risk and diagnosis not obtainable with currently available breast cancer screening methods. Michael H. Torosian, M.D. has recently assumed the role of principal investigator of the project and has updated the clinical and scientific aspects of this project. Over the next several months, several important meetings of the co-investigators will occur prior to formal submission of this research application to the IRB at Fox Chase Cancer Center. Once approval is received from the IRB, subject accrual to this important project is expected to occur immediately.

Statement of Work

- Months 1-2: Meet with all Co-Investigators to finalize project
Perform final statistical projections and make final project revisions
- Months 3-4: Submit project proposal to Research Review Committee and IRB at Fox Chase Cancer Center
- Months 5-12: Patients to be accrued to study
FNA specimens to be obtained
Biomarker assays to be performed on an ongoing basis
- a. Cellular morphology (cytology)
 - b. DNA index (ploidy) and cell cycle parameters (% cells in S phase, % cells in G₂M, % hypertetraploid cells)
 - c. Proliferation index
 - d. Epidermal growth factor receptor (EGFR) overexpression
 - e. p53 hot spot mutations
 - f. RAS hot spot mutations
 - g. Hypermethylation of specific gene products
 1. p16
 2. GSTP 1
 3. E-Cadherin
- Months 13-36: Continue to accrue patients to study, obtain FNA specimens and perform biomarker assays.
Perform statistical analysis and prepare results for publication

Undergraduate Education: Princeton University
Princeton, New Jersey
(1970 - 1974)

Degree: Bachelor of Arts
Major: Biochemical Sciences
Honors: Summa Cum Laude
Phi Beta Kappa
Sigma Xi

Medical Education: University of Pennsylvania School of Medicine
Philadelphia, Pennsylvania
(1974-1978)

Degree: Doctor of Medicine

Medical Licensure: Pennsylvania - MD-024131-E

Postgraduate Training:

1978 - 1979	Intern in Surgery, Hospital of the University of Pennsylvania Philadelphia, Pennsylvania
1979 - 1984	Resident in Surgery, Hospital of the University of Pennsylvania Philadelphia, Pennsylvania
1984 - 1985	Chief Resident in Surgery, Hospital of the University of Pennsylvania, Philadelphia, Pennsylvania
1985 - 1986	Advanced Fellow in Surgical Oncology, Memorial Sloan- Kettering Cancer Center, New York, New York
1985 - 1986	Fellow in Surgery, Cornell University School of Medicine New York, New York

Surgical Oncology Fellowships:

1980 - 1981	Clinical Fellowship, American Cancer Society, Department of Surgery, Hospital of the University of Pennsylvania
1985 - 1986	Clinical Fellowship, American Cancer Society, Department of Surgery, Memorial Sloan-Kettering Cancer Center
1985 - 1986	Advanced Surgical Oncology Fellowship, Department of Surgery Memorial Sloan-Kettering Cancer Center
1985 - 1986	Fellow in Surgery, Cornell University School of Medicine

Research Fellowships:

1972-	Research Fellowship, National Science Foundation, Department of Biochemical Sciences, Princeton University
1973 -	Research Fellowship, Department of Biochemical Sciences Princeton University
1981 - 1983	Research Fellowship, Harrison Department of Surgical Research, Department of Surgery, Hospital of the University of Pennsylvania

1981 - 1983 Research Fellowship, Measey Foundation, Department of Surgery,
Hospital of the University of Pennsylvania

Faculty Appointments:

1979 - 1984 Assistant Instructor of Surgery, University of Pennsylvania
School of Medicine, Philadelphia, Pennsylvania

1984 - 1985 Instructor of Surgery, University of Pennsylvania School of Medicine,
Philadelphia, Pennsylvania

1986 - 1992 Assistant Professor of Surgery, University of Pennsylvania
School of Medicine, Philadelphia, Pennsylvania

1993 -1998 Associate Professor of Surgery, University of Pennsylvania,
School of Medicine, Philadelphia, Pennsylvania

1998- Associate Professor of Surgery, Temple University School of Medicine,
Philadelphia, Pennsylvania

1998- Clinical Director of Breast Surgery Research, Fox Chase Cancer
Center, Philadelphia, Pennsylvania

1999- Program Director, Surgical Oncology Fellowship, Fox Chase Cancer
Center, Philadelphia, Pennsylvania

Hospital Appointments:

1986 - 1998 Attending Surgeon, Division of Surgical Oncology, Department of
Surgery, Hospital of the University of Pennsylvania, Philadelphia,
Pennsylvania

1986 – 1998 Attending Surgeon, Department of Surgery, Veterans
Administration Medical Center, Philadelphia, Pennsylvania

1998- Attending Surgeon, Department of Surgery, American Oncologic
Hospital, Philadelphia, Pennsylvania

Specialty Certification:

1986 American Board of Surgery

1996 American Board of Surgery -- Recertification

Fellowship :

1989 American College of Surgeons
